-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over JP11239926.

Regarding Claims 1-3, '926 teaches a product disassembling and assembling system (Fig. 4), comprising: a commonly used facility (74) configured to assemble a product in an assembly mode and to disassemble a used-product (100) in a disassembly mode; and a computer (82) configured to send an instruction to the commonly used facility for practicing the assembly mode or the disassembly mode, wherein the commonly used facility performs at least one mutually reversible step between the assembly mode and the disassembly mode, wherein the commonly used facility performs at least one step that is identical for each of the assembly mode and the disassembly mode (Abstract; Fig. 4).

The conveyer (74) is partially considered as configured to assemble a product in an assembly mode when it is delivering the used part 102 and to disassemble a used-product (100) in a disassembly mode when it is taking out the part 102.

Regarding Claim 4, '926 teaches a method of disassembling and assembling a product (Fig. 4), comprising: selecting one of an assembly mode and a disassembly mode; assembling a product with a commonly used facility (74) under control of a computer(84) if the assembly mode is selected in the selecting step; and

Art Unit: 3726

disassembling a used-product with the commonly used facility under control of the computer if the assembly mode is selected in the selecting step (Abstract; fig.4).

The conveyer (74) is partially considered as commonly used facility which can be selected one of an assembly mode and a disassembly mode.
